

Remarks

5 This amendment is being presented to provide for proper  
dependency of the claims without the introduction of any new matter  
and correcting ambiguity that resulted in the translation of the claims  
from French into English. Further, the specification has been amended  
through the addition of headings to identify the various parts and a  
new abstract has been added in accordance with current U.S. Patent  
Office practice.

10 This amendments places this application in better condition for  
examination.

Respectfully submitted,

Juan Simon Bacardit Et.Al.
